PREFACE

1993 ANTELOPE HUNTING AND HARVEST REPORT

Survey Approach

Resident and nonresident antelope license holders were randomly sampled from our license database. Hunting and harvest data were acquired via telephone for resident license holders and via a mail survey for nonresidents.

Definitions

NUMBER ISSUED.....The total number of licenses issued or the number of license holders when an individual could have two or more licenses

HUNTERS.....The number of hunters who hunted one or more days

HUNTER DAYS.....Sum of whole days or portions of days hunted

PERCENT SUCCESS.....The number of hunters who killed one or more antelope divided by the total number of hunters and multiplied by 100

LOWER.....Lower confidence limit at a level of confidence of 80 percent

POINT.....The estimated value

UPPER.....Upper confidence limit at a level of confidence of 80 percent

SP.....An abbreviation for special license

SP 700-00.....License holders of 700-00 region 7 multi-district either sex licenses only who did not also hold the unlimited, multi-district, doe/fawn licenses for regions 4, 6 and 7

SP 900-00.....Multi-district archery only license holders

DOE/FAWN.....License holders of the unlimited, multi-district, doe/fawn antelope licenses valid in regions 4, 6 and 7 including those doe/fawn license holders who also held an either sex license valid in a specific hunting district within these regions

SPECIAL.....Used in regional or state summary pages to indicate total of all special licenses except the 700-00, 900-00, or DOE/FAWN license holders which are reported separately

UNKWN.....A symbol for unknown used to designate unknown sex

TOTAL HARVEST.....Estimated total kill for all age/sex classes

Explanations

The antelope hunting and harvest statistics are estimates made from a sample of 21,188 questionnaires representing about 36% of all 58,325 antelope license holders. Confidence-interval estimates are given for hunters, hunter days, and total harvest. Confidence intervals are given at the 80 percent confidence level, meaning that the actual value will be between the lower and upper limit in four out of five cases. The relative precision of the estimate increases with the size of the estimate. Regional estimates have greater relative precision than district estimates and the statewide estimates have the greatest relative precision.

(CONTINUED)

All estimates represented are rounded to the nearest whole number. It is for this reason that rows and columns do not always agree exactly with row or column totals given.

The availability of an additional multi-regional license type, the unlimited, multi-district, doe/fawn antelope license, valid in regions 4, 6 and 7, had an effect on the analysis methodology and interpretation for these regions. Most of these licenses were purchased by sportsmen who already held one of the either sex antelope licenses issued through the drawing. Survey populations were always antelope license holders (a person who held one or more antelope licenses) rather than individual antelope license types. This was done to avoid duplication of hunters and hunter days estimates. The doe/fawn license holder population contained all doe/fawn license holders and included those doe/fawn license holders who also held an either sex license for a specific district. They were surveyed using the more general multi-district questionnaire. Kills made on the either sex license were included with this group. Any multi-district doe/fawn license holder who had an either sex license for a specific district in region 4, 6 or 7 was removed from the survey population of district-specific either sex licenses. These people were then added to the multi-district doe/fawn population. For this reason, the "NUMBER ISSUED" column in the report for the either sex license types in regions 4, 6 and 7 includes only those either sex license holders who did not have a multi-regional doe/fawn license. It does, however, include the license holders whose only additional tag was the district-specific doe/fawn license offered to successful either sex applicants.

- Cover with branches to protect from birds.
- Hang meat if possible.
- Leave article of clothing on meat.
- When returning, make noise and approach from upwind or most visible route.
- If a bear is on the carcass, leave the area and contact a local game warden.
